

Gynaecological Workplace

reduce both spatial demands
in the surgery and the physician's time

Gracie Office

A modern and friendly environment for both the physician and patient emphasizing ergonomics and effectiveness of gynaecological investigation.

A video colposcope and LCD monitor integrated in the chair reduce spatial demands and increase the effectiveness of the investigation.

The instrument tray increases convenience for the physician during examination, providing easy access to material and instruments.

All in one place

Gynaecological examination chair
Integrated digital video colposcope
LCD monitor
Sophisticated and complex instrument tray

The low access height of the seat and foot rests allows for easy positioning even of less mobile patients.

The Gracie gynaecological examination chair combines the advantages of a chair and examination couch in one piece of equipment.

Video Colposcope

An innovative solution provided by BORCAD – integration of a colposcope in the Gracie chair reduces spatial demands and increase's convenience for the physician during the examination.

Technical parameters

Magnification: 1.5x - 20x optical, 10x digital
Visible area diameter: 3 cm (magnification 10x)
Working distance: 24-33 cm
Focus depth: 1 cm (magnification 10x)

LCD diagonal: 17"
Resolution: 1280x1024

Light source: LED
Vessel imaging filter: green color

Data formats for storage: png, avi
Output: USB
Photograph resolution: 640*480 px
Video resolution: 640*480 px

Instrument Tray

Provides a comprehensive background for the physician's work

- heating of metal vaginal speculums
- ergonomic instrument and material layout
- cages/baskets for waste and used speculums.

This solution saves space in the surgery and provides for the physician's maximum convenience when working.

Technical parameters

Length: 600 mm
Height: 1125 mm
Width: 520 mm
Waste basket volume: 17 / 13 l
Used speculums container volume: 25 l
Upper container for speculums volume: 13 l
